Subject: [External] Michael Vryhof, Summerville SC, Docket Number: 2020-229-E

I support energy freedom in South Carolina because we have the ability to generate our own electricity, and no longer need any utility company to be forced into providing every home power 24/7.

I oppose Dominion Energy's direct attacks on solar and energy independence because they have been in control of providing power for a long time. If the utility companies have proven to be been fair and honest, we would not be in the position we are in today. Now that the simple math works in favor of rooftop being less expensive than what it cost to pay a company to provide the very same electricity. It no longer makes sense to have a single source of power.

My family depends on solar energy because of the jobs the industry produces, and the incredible growth this industry has demonstrated. We can do this, a transition away from one unreliable dirty source of power. To a clean renewable source for the very same power.

Thanks
Michael Vryhof
